# 10 TESTING TIPS FOR SUCCESS

LET'S LOOK AT  
THESE 10  
TESTING TIPS  
FOR SUCCESS

03

Make sure  
your iPad is  
fully charged

01

Make time to rest and  
get at least 8 hours of  
sleep

04

Have positive  
attitude

02

Eat a healthy breakfast

05

Read all of the  
directions and answer  
choices carefully  
before you pick an  
answer

**STAY  
CALM  
AND  
ROCK THE  
TEST**

**06**

Take your time.  
Eliminate answers you  
know are incorrect

**07**

Make sure to  
review and  
check your  
answers

**08**

Don't get stuck on  
challenging questions  
, try your best, move  
on and return to them  
at the end

**09**

Take a quick  
brake if you  
know you are  
starting to lose  
your focus

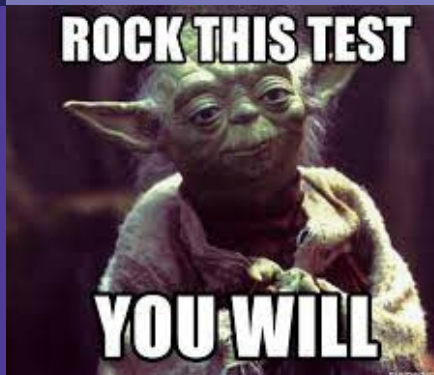

**10**

Make sure you have  
answered every  
question before you  
submit your test

**ROCK THIS TEST**

**YOU WILL**

# Safe & Clean Campuses

- Campuses marked for safe traveling of students and staff
- Every campus has had an antimicrobial application of Microshield 360 on all horizontal surfaces
- Every campus has regular daily cleaning completed with specific chemicals that are safe for schools and work with Microshield 360 treated surfaces
- Deep cleaning takes place on Wednesdays and Friday/Saturdays
- Improved ventilation

**DEEP CLEANING SCHOOLS & WORKPLACES**  
UPDATE FOR THE RETURN TO SCHOOL

**2-1-2 Schedule**

- Deep cleaning Wednesday during the day and Friday evenings
- Developing an Alhambra Gold Standard for clean and sanitized environments in alignment with the CDC

**Microshield 360**

- Antimicrobial application completed annually on all horizontal surfaces with an emphasis on high touch areas (described by the CDC)
- In AEDS applied to all: classrooms, restrooms, offices, conference rooms, cafeterias, kitchens, PE/Rs, Gyms, bleachers, playground equipment, and buses

**Water**

- Water fountains on each campus are being retrofitted for water bottle filling stations
- Currently, all classroom sinks have bubblers that can fill water bottles

**Chemicals at School**

- 4- standardized chemicals approved for schools and safe to use on Microshield 360 treated surfaces
- 10 min. kill time: Spray, let it sit 10 min., then wipe the surface
- We do not want to use other chemicals (i.e. Clorox Wipes)

**PPE Plan**

- Masks, sanitizer, hand soap, and gloves are all available to the schools and can be replenished through the AEDS warehouse
- Hand sanitizer dispensers are already on campus

**HVAC**

- In the past, we used MERV 8 filters, now we are moving up 5 levels and changing to MERV 12 (recommended by the CDC)
- We used to change air filters 4 times a year, now will be changing 8 times a year
- Outdoor air dampers - opened for more fresh air intake

## Masks

**EVERY** person on campus is required to make use of cloth face coverings. The use of masks and face coverings is also required by Governing Board Policy GBGCB-R. **Students and staff must supply their own masks.** Masks must be worn any time a person is inside a building, moving about the campus, or any time a 6-foot distance can not be kept between individuals while outside.

Mask Breaks: Students will be permitted to remove masks when eating breakfast at their desks inside of the testing room.. Students will be permitted to remove masks when eating lunch. Students will be permitted to remove masks when social distancing 6ft during recess or organized outdoor mask breaks.
